Do You Know What to Do If You Are Caught in Your Car in a Lightning Storm?

It may seem that being in a car on the road is one of the most dangerous places that you can be in a thunder and lightning storm. But taking shelter in a car during this type of storm is actually one of the safest places to be.

When lightning strikes the metal roof of a car, most of the current will follow the outside of the car's metal cage and then disappear into the ground.

That does not mean, however, that you can relax in your car during a lightning storm. You must be very careful not to touch any part of the outside of the vehicle.

Take These Steps If You Are in Your Car in a Lightning Storm

Summer weather is unpredictable and severe storms can happen at any time. Stay safe while driving by following these lightning storm safety precautions:

- If you cannot reach the shelter of a sturdy building, stay in your metal-roofed car.
- Pull over to the side of the road and turn off the engine. Turn on hazard lights and wait until the storm is over.
- Close the windows.
- Place your feet close together and well away from the car door.
- Fold your hands in your lap.
- Don't touch anything metal in the car or the steering wheel.
- Don't touch the car's roof or doors.
- Do not operate the car's radio or talk on your cellphone, especially if it is connected to the car.

Technically, it is safe to get out of the vehicle once the electrical current has passed through and entered the ground.

If you or a family member has been injured in a motorcycle accident, a pedestrian accident, bicycle accident or car accident or any personal injury, or has been denied Social Security Disability benefits, it's important to get an attorney experienced in these types of cases involved immediately. 4th
OF JULY

More pets run away on the Fourth of July than on any other day of the year.

JULY 5TH is the busiest day of the year for animal shelters nationwide.

30% The increase in the number of lost pets between July 4th and 6th.

LOST
7.6 million animals are lost each year

Only 26% of dogs are returned to their owners

Over 35% of lost pets are euthanized annually

Tips to Keep Your Pet Safe on the Fourth:

The Fourth of July is a scary time for our furry friends. The high-pitched squeals, thundering booms and bright flashing lights of the fireworks can send even the bravest dog running. On the Fourth, pets need their master's help and reassurance to keep them safe and at ease.

Ensure your dog gets plenty of exercise during the day before the fireworks begin.

Provide a safe place for them to retreat like their crate or bed and check on them every few hours.

Make sure your dog has a collar and ID tag, and make sure their Tagg GPS Pet Tracker is fully charged.

Keep your pets indoors, lower blinds and close the windows so they won't be frightened by the noise and bright lights.
